

Elevate Business Support Programme

BE Inspired. BE Connected. BE Successful.

Join us and benefit from the following:

One to one advisor sessions, providing you with tailored advice and practical support based on your requirements.

Practical Elevate workshops; come together and get practical support to help realise your ideas.

Access to our Partners programme, in which each partner will offer free initial consultations and discounted rates in specialist areas of business including employment law, grants, access to finance, tax and raising equity.

Free networking opportunities, including meet the neighbour and calendar events throughout the year, along with business breakfast networking events for wider networking and collaboration with external companies and partners.

Collaborative and innovative space for growing businesses.

PR guidance and support from our knowledgeable team to help you share company news with the relevant media.

A recognised cluster location for advanced engineering companies, wider technology and digital enablers.

Potential to recruit great talent through our relationships with various colleges and universities, particularly for the neighbouring Science and Engineering Technical College (UTC).

Discounted meeting room bookings.

Active social media promotion via a number of channels.

Our business support programme which is free and completely exclusive to businesses based here, is specially designed to provide essential tools for your business to Elevate to the next level. It is hugely important to us that our community has the support and resources needed to succeed and grow.

Our purpose is to encourage and facilitate the growth of start-ups and SMEs within the advanced manufacturing, digital technology, and engineering sectors. Our space provides a collaborative community and innovative environment to support the development of technologies towards Industry 4.0.

We offer tailored advice and practical support based on your needs including expert advice on key areas for growth including funding and grants, IP and innovation, marketing, plus exclusive networking opportunities.

All support received is provided by our internal development team as well as from our external business partners; professional services organisations with proven expertise that we believe would benefit you.
